Experience It! Monteverde Cloud Forest

Only four places in the world boast an ecosystem so unique that it produces a cloud forest, and Costa Rica is one of them. Situated high on a mountain, the Monteverde Cloud Forest is created by the forest's dry air combining with the humid, hot air of the rainforest. The result is a blanket of clouds that covers the forest, mimicking constant rainfall. This extremely wet environment has bred a diverse world of exotic flora and fauna. One of the cloud forest's most famous residents is the endangered, resplendent quetzal. This colorful bird sports a golden beak and a green-hooded head, tail feathers of gray, black, and white, and a vibrant scarlet breast. Highly elusive, quetzal sightings are rare, but absolutely unforgettable when attained.
